DESCRIPTION

The 2026 Honda CBR650R E-Clutch is a middleweight sportbike that blends high-performance riding with everyday usability. It features a smooth, high-revving 649cc inline-four engine and sharp, race-inspired styling, making it both fast and practical for street riding. What sets it apart is Honda?s E-Clutch system, which lets you shift gears without using the clutch lever?while still keeping the option to use it manually. This gives you the convenience of automatic-style operation with the control of a traditional manual, plus quick-shifter functionality for seamless upshifts and downshifts. Overall, it?s a well-balanced sportbike offering strong performance, advanced rider aids like traction control, and a more accessible, user-friendly riding experience.
